## GAME SETTINGS - DIP SWITCH SETTINGS (SWITCH \# 1)

All game settings in Ticekt Mine can be programmed using the three dip switch banks on the I/O board. The switches are Switch \# 1 (SW1), Switch \# 2 (SW2), and Switch \# 3 (SW3). Reference the chart below to make program changes including the number of coins required to start the game, the length of game play, and the score group options for SWITCH \# 1 (SW1). To operate the program, move each switch to the ON or OFF position. Switches moved towards the word ON are ON. Switches moved away from the ON towards the numbers are OFF.

| ITEM DESCRIPTION | CONTENT | SWITCH \# 1 |  |  |  |  |  |  |  |

## GAME SETTINGS - DIP SWITCH SETTINGS (SWITCH \# 3)

All game settings in Ticket Mine can be programmed using the three dip switch banks on the I/O board. The switches are Switch \# 1 (SW1), Switch \# 2 (SW2), and Switch \# 3 (SW3). Reference the chart below to make program changes including double score play, duel meters, and various testing options for SWITCH \# 3 (SW3). To operate the program, move each switch to the ON or OFF position. Switches moved towards the word ON are ON. Switches moved away from the ON towards the numbers are OFF.

The Ticket Mine input/output board utilizes 5 input IC's to control all inputs used within the game. In Ticket Mine, only ONE of the FIVE IC's are used. You may use the FOUR spare input IC's in U09, U10, U11, \& U12 on the board in order to replace the other input IC's should one become corrupt.
